Computer Science Student | Android/Web Developer | Kotlin | Java |
HTML5 | Css | Javascript | Mongodb | Node js | Express js
Bhopal, Madhya Pradesh, India

Summary

I am a Final-year Computer Science student with a keen interest in Android development, actively building the skills and experience necessary to transition into full-time roles in mobile app development or related software engineering fields.

My journey in tech has been fueled by a passion for creating intuitive, user-centric mobile experiences. Through academic and personal projects, I've built a strong foundation in Android development using Java and Kotlin, with practical experience in Android Studio, Firebase, REST APIs, and responsive UI/UX design principles.

In addition to mobile development, I am also a MERN stack developer, proficient in building full-stack web applications using MongoDB, Express.js, React, and Node.js. This broader skill set has deepened my understanding of software architecture and backend integration—valuable assets in mobile and cross-platform development.

Through these experiences, I've grown in communication, collaboration, and critical thinking—qualities I bring to every project I join. I'm currently seeking opportunities to contribute to meaningful Android or MERN stack projects, learn from experienced teams, and create applications that deliver real value to users.

Experience

NexLogic Innovation Private Limited
SDE -1
May 2026 - Present (4 months)
Bhopal

AnyTechPros InfoTech LLP
